DETAILED ACTION

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections

Claim Rejections - 35 USC § 112

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Correction or clarification is required.

In claims 1, 11, 18 and 20 it is unclear what the "voltage tolerance" is and how it is provided. The same is true for reciting "fail-safe protection" in claims 2 and 12.

In claims 5, 8, 16-17, it is not understood what the "native NMOS device" is.

In claim 6, it is unclear what the "low voltage difference circuit" is and how the apparatus can be "implemented".

The remaining claims are dependent from the above rejected claims and therefore also considered indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 are rejected under 35 USC 102 (e) as being anticipated by Figure 20 of Taguchi (US 6,225, 855).

Claims 1-20 are further rejected under 35 USC 102 (b) as being anticipated by Figures 2-4 of Okamura (US 5,712,536) and Figure 7 of Akira (JP41120504).
